Useful tips

1) Review that all the information of the participants is correct and all the questionnaires of evaluation are answered before closing the information and generating the report.

2) It is necessary to verify that all have completed the course and the tests of the OLS.

3) Before generating the final report, mobilities and the budget must be reviewed completely and all information must be completed. We will have to have the manual available to send the budget and solve any error that the system can give us, if we do not do it like this we might not be able to generate the report.

4) The maximum number of characters that can be written in each question of the report must be taken into account.

5) Before beginning the report, it is advisable to print the report blank and make a first draft word to be able to work offline. Have the guidance manual at hand to be able to resolve doubts and instructions (often there are questions that seem to be repeated).

6) All questions (boxes) must be answered. If there is nothing to say, write (No Applicable). ALL THE AREAS ARE MANDATORY!

Very important, write the final report with time enough, so the last day before deadline the platform is overloaded, and may need hours to submit the report.

The Final report template might slightly differ from country to country.
2. How to Complete and Submit your Beneficiary Report

The Project Beneficiary – Mobility Tool user will need to log into the Mobility Tool through the ECAS Portal using their ECAS User Name and Password.

The Final report is generated through information provided in the MT, so this must be up-to-date.

The Beneficiary should then choose the correct project to complete and submit.

You might have more than 1 project in MT, select the correct project.
At this point the Beneficiary checks the details within the report and that the content information is up-to-date, details here include: Project Information, Details of the Call, date, etc. Beneficiary Organisations, National Agency and Mobility Tool Project History. If all is correct proceed to the next section, if information is incorrect, please amend, the tool at this point allows you to edit the participant’s details. Any adjustments made here will update other sections of the Mobility Tool, such as the Budget Summary. The following section will display Total approved Budget and Current Budget Spent as well as Activity Type, at this point you should include Organisational support. The total columns will produce final figures and percentage of spent for each budget line.

Note: If organisational details do require to be updated the Beneficiary should inform the NA and when updated/amended by the NA that only then should the Mobility Tool be adjusted. When all is correct, the Beneficiary should process to the Beneficiary Report which will be generated by clicking on the reports tab.

Important to check and cross-reference the information in the MT with your own records for correctness.
